

YOUNGDALE E-Z MOUNT ALIGNMENT TOOL

The E-Z Mount is an adjustable tool that supports cabinet doors and ensures vertical alignment during installation.

The E-Z mount works with both left and right hand doors, and can be used on most models and styles.

ASSEMBLY

The E-Z Mount can be assembled by referring to the illustration (left). Use spacers to allow for face frame thicknesses over $\frac{3}{4}$ -inch.

DOOR INSTALLATION

The E-Z Mount works on cabinets with face frames ranging from $\frac{3}{4}$ -inch to $\frac{7}{8}$ -inch thickness, and accommodates vertical door overlaps from $\frac{1}{4}$ -inch to $1\frac{1}{8}$ -inch.

To use:

- First, adjust the E-Z Mount for desired overlap.
- Lock it behind the right or left door face frame. (Follow illustration).
- With hinges attached to door, place bottom of door on the support shelf, and fasten hinges to face frame starting with top hinge.
- Remove E-Z Mount and proceed to next door!
